Websites and platforms

World-class solutions for sites your users will love

Developing websites is about so much more than marketing. It's also about aesthetics. For us, your site is the face of your company. Let's make it stunning.

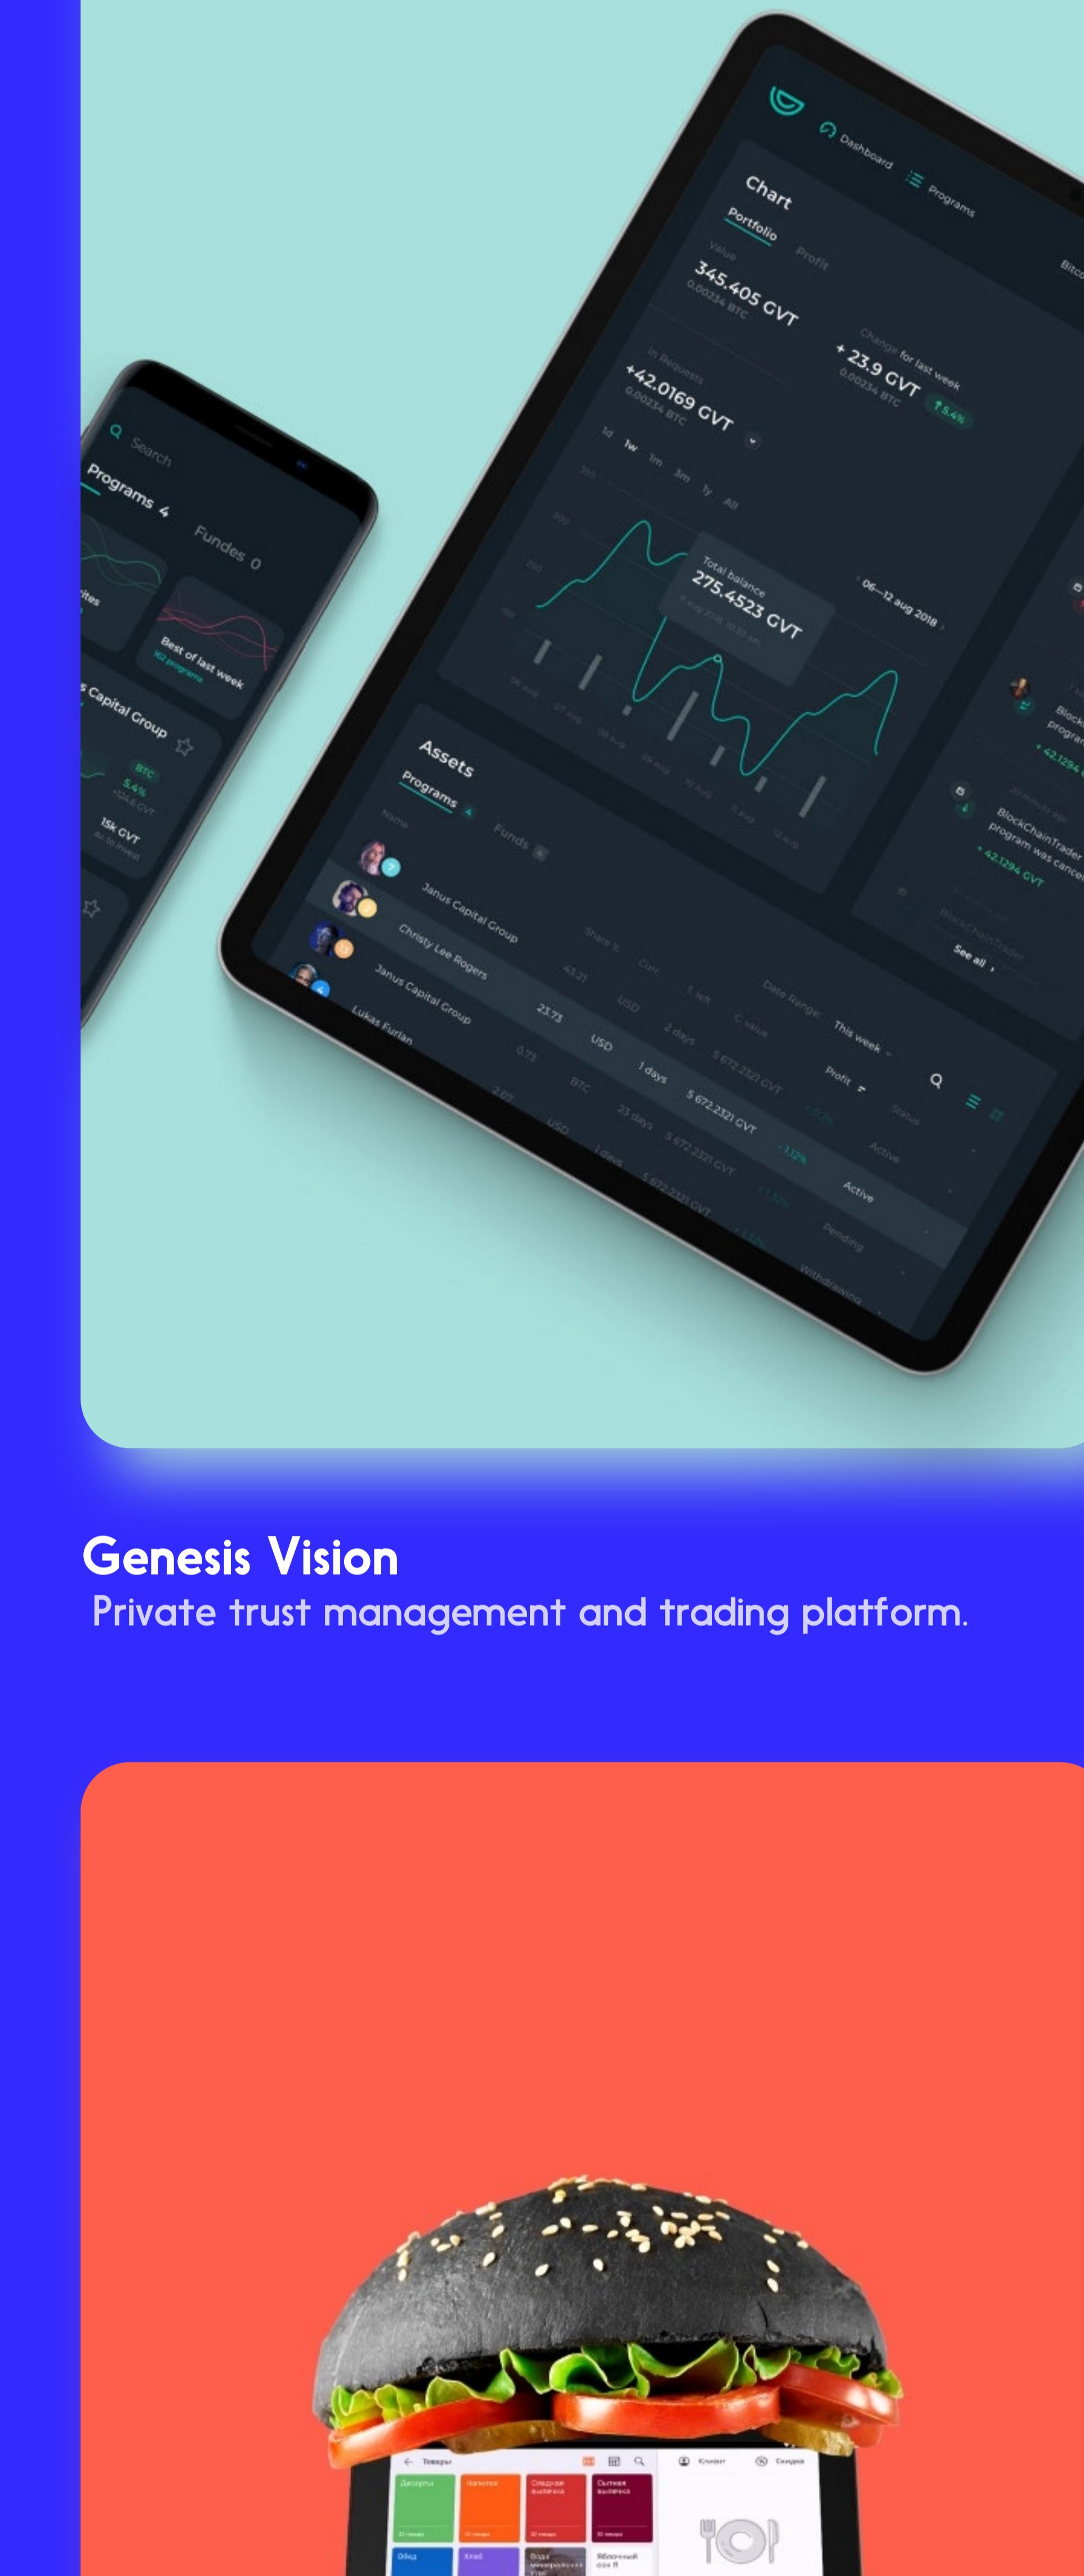

Our work

To see us in action, explore our work. Our internationally acclaimed, award-winning projects lift us above the crowd.

Wicket

A new way to think about money.

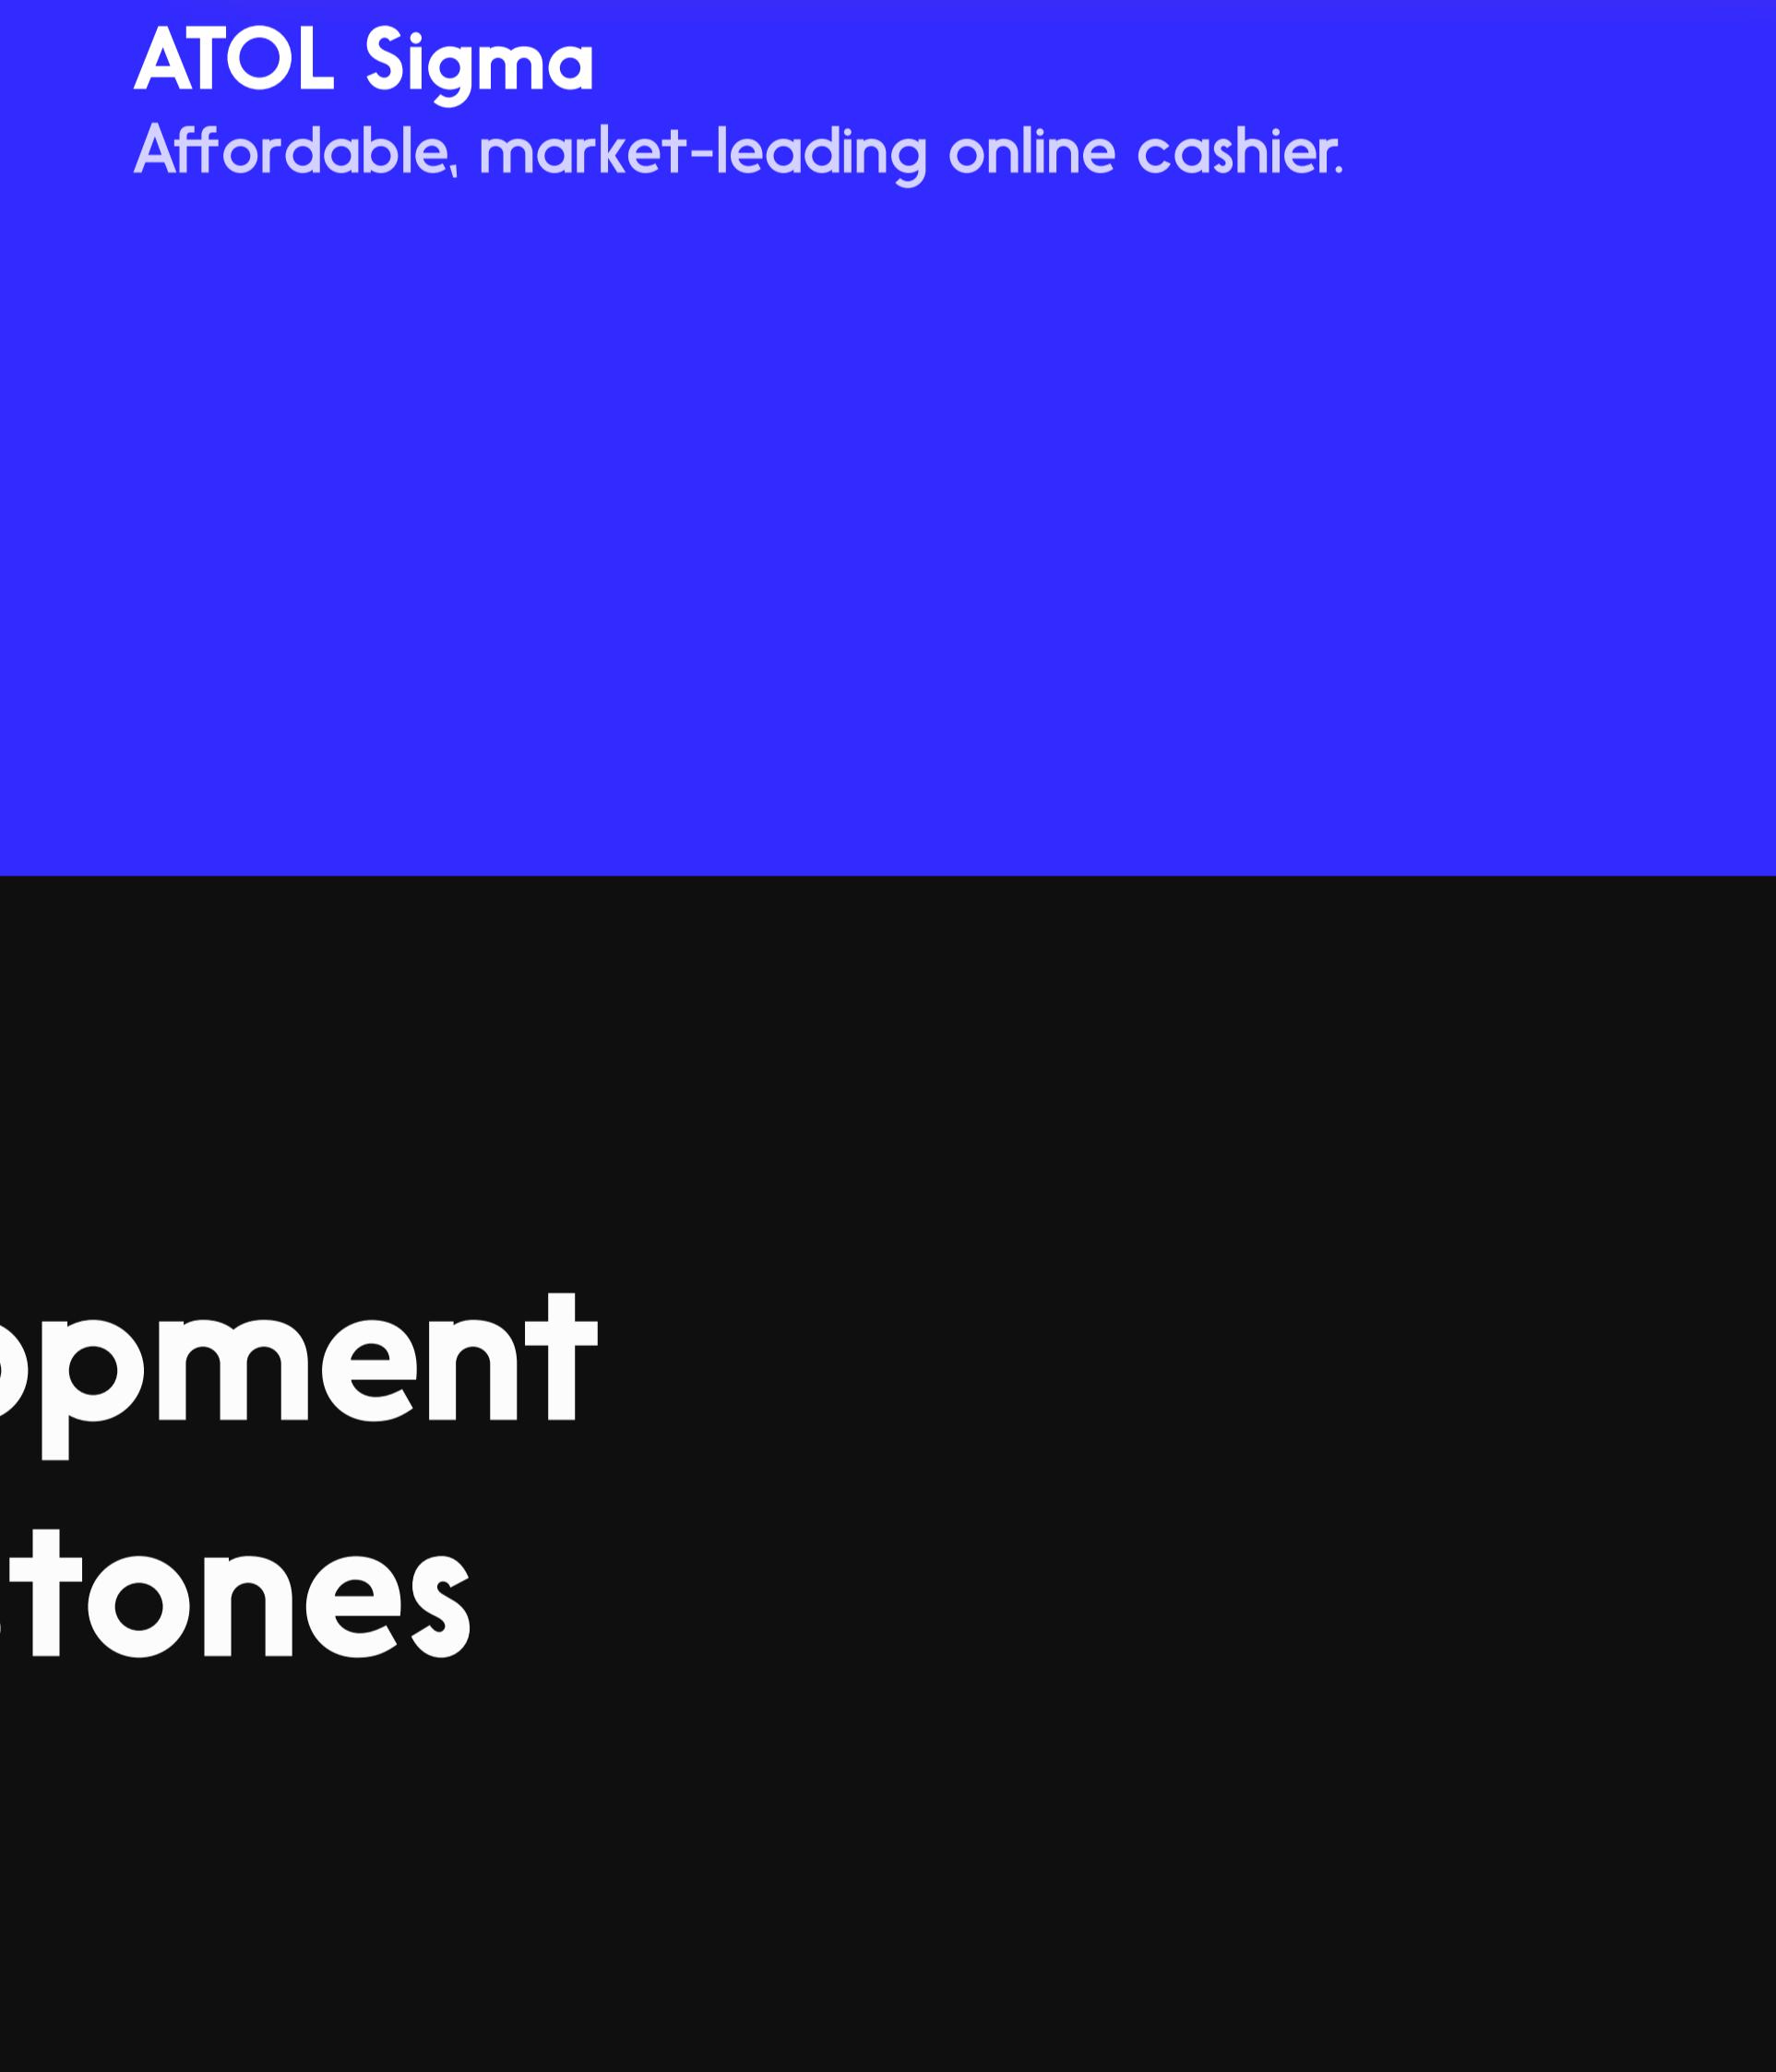

Nana Asia

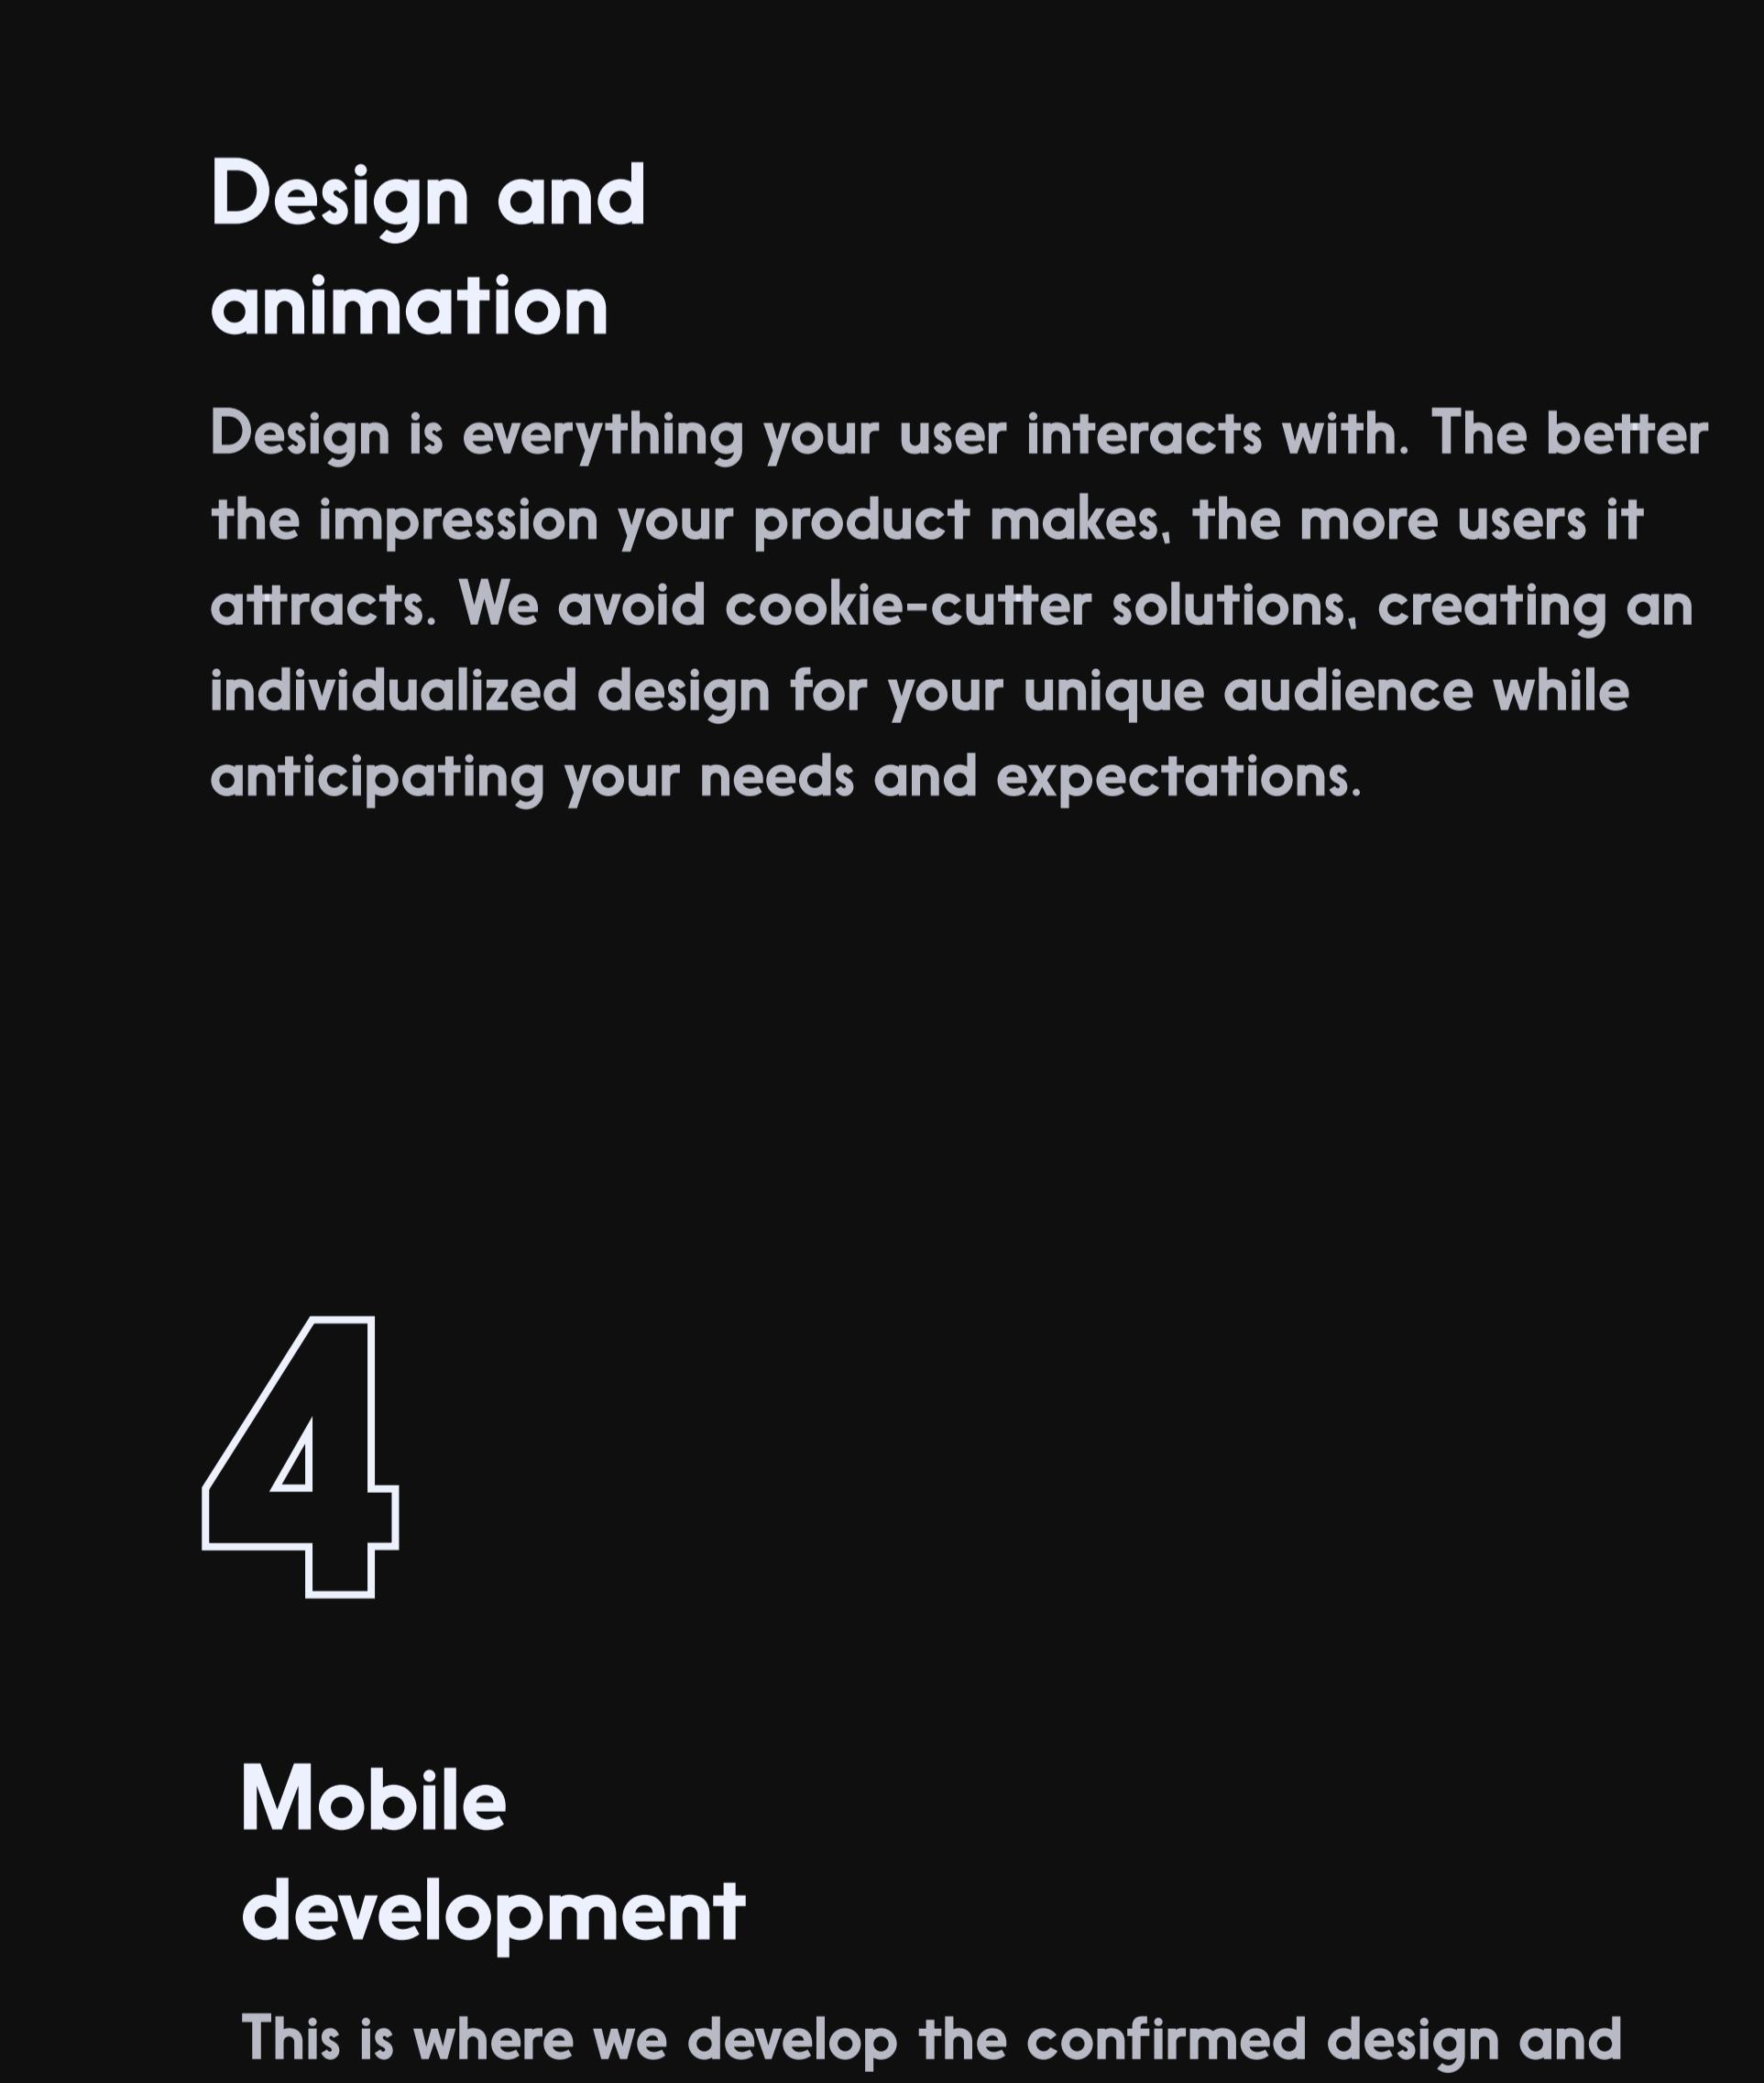

Riyadh

Official website of Riyadh, Saudi Arabia's capital.

Genesis Vision

Private trust management and trading platform.

ATOL Sigma

Affordable, market-leading online cashier.

Development milestones

1

Research and development

During this phase, we help you finalize the functions list, prepare the technical requirements, and develop the application architecture with a roadmap of interactivity (UX). We can also make an interactive prototype and test it with a focus group.

2

Design and animation

Design is everything your user interacts with. The better the impression your product makes, the more users it attracts. We avoid cookie-cutter solutions, creating an individualized design for your unique audience while anticipating your needs and expectations.

3

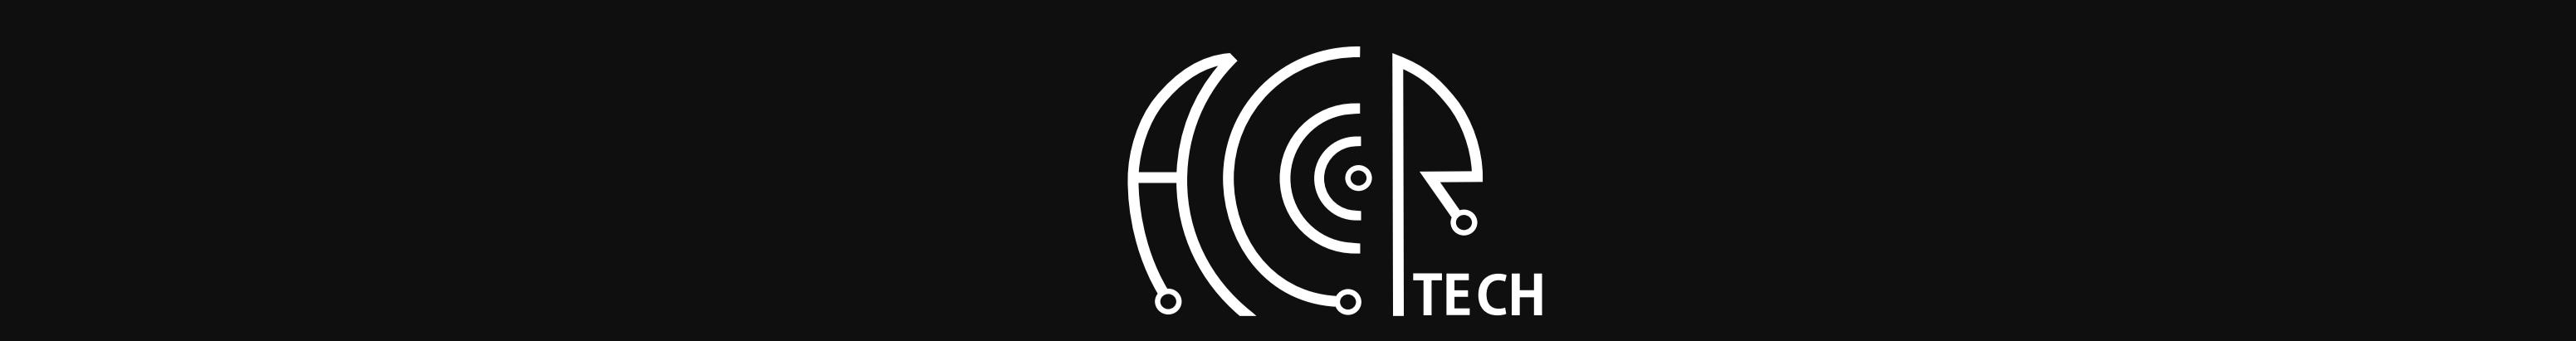

Backend development

Most applications involve data. Depending on functionality, this may include storing user data, storing photo and video content, search, showing actual products, and more. API documentation is tailored to communicate with mobile applications.

4

Mobile development

This is where we develop the confirmed design and dive into business logistics. We build products exactly as they were during the design phase, no short cuts or simplifications. Based on client needs, we also make micro-animations and transitions between screens.

The image shows a screenshot of the OHM Health mobile application. At the top, there is a navigation bar with a blue header containing the OHM Health logo and a search bar. Below the header, the main content area has a light gray background. On the left side of the content area, there is a vertical list of categories: "Medical Record", "Prescription Refills", "Referrals", "Radiology", "Procedures", and "Lab Results". The "Radiology" category is currently selected, indicated by a blue background and white text. To the right of the category list, there is a large, semi-transparent circular graphic featuring a stylized figure. In the center of this graphic, the word "OHM" is written in a large, bold, sans-serif font. Below "OHM", the word "Health" is written in a smaller, regular sans-serif font. At the bottom of the screen, there is a blue footer bar with the text "OHM Health" and a small circular icon.

4

The image shows a close-up of a smartphone screen displaying a food delivery application. The background is white with yellow decorative elements. On the left, there are circular icons for different cuisines: a cheeseburger for 'American', a dumpling for 'Asian', and a pizza slice for 'Italian'. Below these are the labels 'American', 'Asian', and 'Italian'. In the center, there is a section labeled 'Persons' with a count of '1' and buttons for decreasing (-) or increasing (+) the number. To the right, the letters 'Bu' and 'L' are partially visible, likely part of a word like 'Buy' or 'Delivery'. The overall design is clean and modern.

A breakfast sandwich is shown on a wooden board. The sandwich is cut in half, revealing layers of scrambled eggs, bacon, and salmon. It is served with a side of fresh greens and a small bowl of salsa.

The image consists of two horizontal bands. The upper band is a uniform medium blue color. The lower band is a solid black color. There is a thin white border separating the two bands.

Hosting on clouds

Trust your site on our
hosting servers.

We build native applications, devoting ourselves to development and design. It's our way of creating products that your users will be in love.
